

BIG PECKER

LEAK DETECTOR

Big Pecker Leak Detector is easy to apply, reliable and economical. A small application spreads immediately, and a visible foam of live bubbles will pinpoint the source of leak.

Big Pecker Leak Detector is safe, non-flammable and non-irritating.

Big Pecker Leak Detector's formula has been tested and performs to specified sensitivity. However, at very low leak rates, the bubbles will form more slowly and may require magnification.

FORMULA NUMBER	APPLICATION	SENSITIVITY	TEMPERATURE RANGE
TG-77	Stainless	1×10^{-5}	+35°F to +160°F

Big Pecker Leak Detector is marketed in 8-ounce squeeze bottles with extended tube for hard-to-reach places.

NOT RECOMMENDED FOR OXYGEN
